Exterior Treatment - Preparation Instructions

- All patio furniture needs to be pulled about three feet away from the foundation.
- Any hanging plants need to be taken down and covered with a sheet or brought inside.
- Gardens/Flower Beds along the perimeter of the home will need to be covered to ensure plants don't receive potential chemical burn.
- All windows need to be closed in order for exterior treatment to be completed.
- Any sprinkler systems must be turned off 24hrs before treatment and remain off for four hours after treatment.
- Everyone must be inside or away from the house for two-to-four hours after treatment. If anyone in the home is pregnant, they must be inside or away from the house for 24 hours. If anyone has breathing problems, such as asthma they must be inside or away from the home for six-to-eight hours.

Please be advised that all power washing or pressure washing must be completed prior to the application of any exterior pest control services. In the event that power washing is conducted after the completion of our exterior treatment, any guarantee associated with the service shall be rendered null and void. This policy is in place to preserve the integrity and effectiveness of our treatment applications.
